## SUNRAYS

Form 4-letter words using only the nine letters in the center of the diagram. Do not repeat a letter within a word. Place your words into the rays of the diagram so that no two words that are next to each other share a letter.

Our solution on page 128

## PIECE BY PIECE

We have eliminated the spaces between the words in a message and divided all the letters into 3-letter pieces. Rearrange the pieces to reconstruct the message. The dashes indicate the number of letters in each word.

## MISSING VOWELS

Before you can loop these words, you must first fill in the circles in the diagram with the missing vowels A, E, I, O, and U. Words in the diagram read forward, backward, up, down, and diagonally, and always in a straight line. Circle each word when you find it and cross it off the list. Words will often overlap, and some letters may be used more than once. Not all of the letters in the diagram will be used. We have filled in and circled ACADEMY as an example.
