

KAKURO 1

To solve Kakuro puzzles (also known as Sum Totals and Cross Sums), place one digit (1 to 9, no zeros) in each square so that the sum of the numbers in each group of squares across or down is the number given. The number below a diagonal line is the sum of the numbers below it. The number above a diagonal line is the sum of the numbers to the right of it. **IMPORTANT:** No digit is used more than once in any group of squares leading to a sum. One group of digits has been given for you.
